1340 Evo Motorcycles for sale - SmartCycleGuide.com

When I first start the engine up my oil gauge shows 30 psi. Once it is warmed up and under load it shows 20 psi. and it has gone to 5-10 psi and come back up again. At idle it shows 0 psi. Is this something I should be worried about or is it normal for a Twin Cam 88. If you could shed any light on this matter I would greatly appreciate it.
