Complete Engines for Cadillac DeVille for sale | eBay
The Northstar engine was a family of high-performance 90° V engines produced by General Motors between 1993 and 2011. Regarded as GM's most technically complex engine, the original double overhead cam, four valve per cylinder, aluminum block/aluminum head V8 design was developed by Oldsmobile R&D. [citation needed] but is most associated with Cadillac's Northstar series.

Northstar engine series - Wikipedia
With the 4.9 this is usually contributed to the ISC motor. There is a setting in the memcal that can be changed to help eliminate this. Basically there is a setting for a "desired idle". This is the engine speed that the PCM tells the ISC motor to use until the vehicle speed is below 5MPH (then it drops to your idle speed).
