ACGIH - Industrial Ventilation – 24th Ed. - 2001 The ACGIH Manual of Recommended Practice should be used as a contemporary source of best design practices for the range of design configurations likely to be encountered in the laboratory facility. This manual is a great resource for airflow rates needed in an energy-efficient laboratory.

ACGIH - Industrial Ventilation - 24th Ed. - 2001

The recommended maximum allowable carboxyhemoglobin level for workers is 5 percent, which corresponds to an 8-hour exposure of 35 ppm. Exposure at the current PEL of 50 ppm for 8 hours will yield a carboxyhemoglobin level of 8 to 10 percent in most workers.
