Oracle Database 2 Day + Application Express Developer's Guide

End User's Guide. An introduction to using Oracle APEX applications for end-user functionality including interactive grids, interactive reports, Websheets, and more.

Documentation - Oracle APEX

Treat the first argument as a pattern and return a string using the second argument for substitution and formatting. The substitution and formatting are the same as apex:outputText and the Java MessageFormat class. Non-string types in the second argument's List are implicitly converted to strings, respecting the toString() method overrides that exist on the type.
