Surface Area. The surface area of a 3D shape is a measure of how much area the surfaces of that shape have in total.. Shapes that you have to work out the surface area of can fall into one of two categories. - All the faces are flat - E.g. Square or rectangle. - Some/all of the faces are curved - E.g. cone or sphere.. Make sure you are happy with the following before continuing:

Surface area and volume. Z. Circles: Area and Circumferences. Z. Circles 2: Part Circles. Desmos. Z. Lifting the Rainbow. I will use it in a Volume Olympiad where student select "events". Since not all students are working on the same task, I need it in this form. If the entire class was doing this task, I would use the 3 Act format.
