Minerals - Comprehensive guide to Rocks and Minerals

Garnet Garnet is a group of silicate minerals with six distinct varieties. It is widely used in jewelry making and as an industrial abrasive. The chemical formula is $X_3Y_2Si_3O_{12}$. The Mica Group is the name given to a group of silicate minerals that have silicon and oxygen as their two major components. Muscovite is a member of the mica mineral group. It is more important as a rock-forming mineral than as a collectible specimen.
