SetJavaHome C:\Program Files\Java\jdk1.7.0_51
```

Oracle Sql Developer

For me it didn't work but the IT admin guy at my workplace said I've got to install the 32 bit JDK and give the path of that in the conf file. I also have a 64 bit OS. After I did that, the sql developer client started working for me. I don't know the root cause of the issue. I guess my fix is a workaround that worked on my machine.
