The Gap: The Science of What Separates Us From Other Animals by Thomas Suddendorf The Gap is an excellent book about what separates human minds from non-human minds, and hence the gap. Psychologist Thomas Suddendorf has provided readers with interesting perspectives on human evolution.

The Gap: The Science of What Separates Us from Other ...

"In his admirably clear and cogent first book The Gap: The Science of What Separates Us from Other Animals [Suddendorf] seeks a middle way that does justice to other species while arguing that there really are important differences between us and them.... Suddendorf's book is a fine introduction to this fascinating field and deserves a wide audience."

Defining God-of-the-Gaps. God-of-the-gaps arguments use gaps in scientific explanation as indicators, or even proof, of God's action and therefore of God's existence. Such arguments propose divine acts in place of natural, scientific causes for phenomena that science cannot yet explain. The assumption is that if science cannot explain how something happened, then God must be the explanation.
