Threading Pdo Thread Lift Face

A PDO thread lift is designed to lift the face to reduce fine lines and wrinkles while encouraging collagen production. PDO threads come in a variety of textures for customized treatments. Here is a quick guide for what to expect before, during, and after a PDO thread lift.

PDO Thread Lift - Procedure Overview, Cost, Recovery ...

The “thread lift” or the PDO threading procedure. A thread lift is a type of procedure wherein temporary sutures are used to produce a subtle but visible “lift” in the skin. Instead of removing the patient’s loose facial skin surgically, the cosmetic surgeon simply suspends it by stitching up portions of it.

...

Christine had a 5 point thread lift using PDO cog threads (which are slightly barbed to induce a higher rate of collagen synthesis) to lift her nasolabial folds, jowl and marionettes. She also had multiple PDO mono threads inserted to improve the appearance of her double chin, loose connective tissue and platysmal bands.

PDO Thread Lifting: Before and After - Save Face

While thread lifts certainly produce visible changes, they will generally only lift the face by a few millimeters; as such, they create a more subtle and natural looking end result than facelift surgery. Thread lifts are therefore best suited to patients who are dealing with mild to moderate, rather than severe, signs of skin laxity.

What you need to know about thread lifts | ASPS

There are different kinds of threads which may be used to lift any part of the face, including the forehead, cheeks, jowls, jawline and neck. The two main types are made of either Poly L lactic acid (PLA) or polydioxanone (PDO) also caprolactone.
