Truss - Assumptions

On a truss problem, it is often helpful to write in values as you solve for them. I have done so above. With AB and AC known, let's look at joint B. Sense of unknown forces is assumed. (You may either make a guess

To solve this problem by the method of sections, you pass a section (indicated by a line) through three members of the truss, one of which is the desired member. The next step is to draw a free body of one part or the other indicating all known and unknown

This movement which can just cause a simple hairline crack or create large gaps and cracks along the corners is a cosmetic problem mostly in homes in cold climates. I think the best approach is to stop the truss uplift ...
