### Why Is There Something Rather

The question, "Why is there something, rather than nothing?", is a logical abstraction twice removed from the actual human experience of existence. As a logical abstraction, "some thing" cannot be the starting point of a philosophical argument which reaches, in conclusion, the existence of any entity, let alone that Being whose nature is to exist.

So, returning to our original question, "Why is there something rather than nothing?" before we can attempt to answer this, we first need to know what kind of question it is. Are we asking about reasons, or are we asking about causes? The traditional answer to this question appeals to God's will.

### Why Is There Something Rather Than Nothing? | Philosophy Talk

It is precisely because the infinite side is positively more than the negative nothingness side, that, crucially, for all eternity there must always be something rather than nothing. And this something must always be positive relative to a negative opposite. • When positive and negative cancel each other out there is nothing. But because there must always be something rather than nothing, then positive will always win out over negative.

Modern physics suggests that the universe can exist all by itself as a self-contained system, without anything external to create or sustain it. But there might not be an absolute answer to why it exists.

### Why Is There Something, Rather Than Nothing? - Sean Carroll

To explain why something exists, we standardly appeal to the existence of something else. There are mountain ranges on Earth because there are plates on its surface that slowly collide and crumple up against each other. There are rings around Saturn because there is an immense quantity of rubble orbiting that planet.
